

HW-TL007

GAIT TRAINING DEVICE

HW-TL007

FEATURES AND HIGHLIGHTS

Product application positioning: Hospitals, clinics, families.

Design: By manually controlling the lifting of the lifting column, the weight-reducing sling is also raised and lowered, thereby reducing the weight-bearing weight of the patient's lower limbs or waist. It enables patients to stand, walk and perform gait training safely. Through training, it gradually enhances the walking ability of the patient's lower limbs while supporting their own weight, and ultimately restores walking function.

Technical parameters

▪ Full size (LxWxH):	1200×1090×1800 mm
▪ Column Adjust:	0-300 mm
▪ Armrest Adjust:	0-390 mm
▪ Net Weight of Product:	44kg

Material

The main frame is made of high-strength carbon steel and has strong load-bearing capacity, with a maximum load-bearing capacity of 135 kg.

Welding / Coating

Robot welding is used, the welds are smooth, and the surface is powder coated. Flat, smooth and easy to clean.

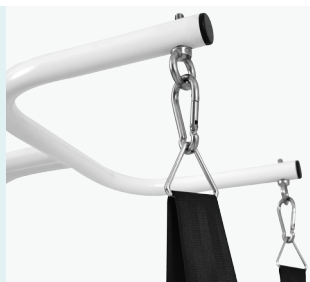

Fixed Pillar/ Adjustable Column

Thickened fixed three-dimensional pillars provide stronger load-bearing capacity. Hand-operated lifting column, manual operation, no power required, easy lifting, lifting range 0-30cm.

Sling frame

Strong and flexible sling frame, the maximum load can reach 135kg.

**Sling**

Thickened nylon knitted sling, safety lock design, strong and comfortable, dirt-resistant and washable.

**Armrest**

The foam-wrapped armrests are comfortable and easy to hold, and the height can be adjusted according to the patient's needs. Height adjustment range 0-39cm.

**Rocker Handle/Lifting Control**

The rocker handle rotates to control the lifting and lowering of the column. Manual lifting control device makes it easy to lift the patient.

**Caster**

4-inch medical universal wheel, silent, flexible, four-wheel with brakes.

**Base**

Thickened and widened base, U-shaped support, stronger load-bearing, more suitable for tall people lifting and walking training.

As the circumstance of printing, the photos might have minor difference on color, tactile from real products.
As the update of design and improvement, parameters and outlook of products might change, thanks for understanding.
