Structural design

The bed is composed of two parts: main bed and leg bed. The main bed table is divided into two parts: the back plate and the seat plate.

**Application**

This delivery bed is suitable for general operations such as maternal delivery, prenatal examination, abortion surgery, gynecological examination, etc.

**Bed frame**

The main bed and the auxiliary bed are separated separately, or they can be connected into one.

**Leg bed table**

The upper and lower folds of the leg bed table are adjusted by the ratchet rack mechanism to ensure the comfort of the patient's legs during the operation and the main bed table folds to meet the needs of the posture of the operation.

**Mattress**

Composed of 3 pieces, connected by a push button, with a sponge inside the artificial leather, leather fireproof, yellowing resistance, anti-mildew ball, twists and turns, abrasion resistance 100,000 times.

**Fixed and movable casters**

4 non-slip foot pads, 4 movable casters, and The foot brake locking device is attached to ensure the stability of the leg bed when it is used, and it is more convenient to push.

**Anesthesia infusion stand**

Use to hang medicine bottle during infusion, height can be adjusted.

**Shoulder Holder****Arm Holder****Lithotomy Rod****Stirrup****Hand Bar**

As the circumstance of printing, the photos might have minor difference on color, tactile from real products.
